

## **Accelerated** Efficiency Definitive **Reliability**

---

Seundo Energy is one the leading and sprightly EPC companies in Bangalore, India. As a company, Seundo energy is capable of meeting the challenges of the rapidly growing global energy market.

## Harish SM

Managing Director

We have a world-class team who have a proven track record of success. Our combination of entrepreneurial drive and innovative thinking has successfully driven value across the globe.

**“Our mission To partner with our clients and provide efficient energy solutions across the globe, ensuring satisfaction with integrity, efficiency, and a high productivity level.”**

# COMPANY

## SEUNDO ENERGY PVT LTD

We are one of the fastest-growing integrated energy EPC companies in Bangalore, India, creating value across the energy sector by delivering optimal value-focused engineering solutions and economic benefits with reliable solutions across the value chains in the power and energy sector.

**We have a high level of expertise and highly qualified personnel across the full range of renewable energy applications, ranging from stand-alone solar parks to complex oil and gas installation projects with integrated energy storage. We cater to every need and drive value.**

### OUR VISION

To be the top EPC provider in India for clean and well-regulated energy generation and provide cost-effective, reliable, and efficient solutions for Renewable Energy Projects.

### OUR GOAL

To generate superior value and exemplary value for every customer with a high level of competence and engineering excellence through highly productive and performance-driven solutions.

### CLIENTS

# COMPANY

## HISTORY & OBJECTIVES

Founded in 2016 under the leadership of Mr. Harish SM, Seundo Energy Pvt Ltd has become one of the fastest-growing solar companies in Karnataka, India. Seundo Energy was incepted with a goal to create value-driven energy solutions and has ever since worked its way to revolutionize the energy generation domain.

Since early 2016, we have grown extensively and consistently and have successfully driven value to each of our customers across value chains.

As an organization, we have consistently evolved in terms of advanced technology adoption and have embraced to advanced engineering platforms for the design, construction, implementation, and operation management of complex infrastructure and plants in the Solar, electrical, and Oil and Gas segment.

We support our clients throughout the entire project cycle - from identifying needs to decommissioning, employing all our professional expertise to operate in the most challenging contexts. Our highly qualified engineering teams add value throughout and effectively manage the most complex and difficult projects.

Seundo Energy caters to every varying need of its customer, be it of any size. We have adapted ourselves to meet every customer's needs and to overcome the challenges of the rapidly growing global energy market. We have channelized and equipped teams to handle multiple energy generation requirements, from solar energy generation to complex oil and gas installations.

---

## PROCUREMENT

---

We have established a reliable supply chain across the globe. We are capable of conducting multi-agency collaborative purchases keeping in mind a favorable outcome and value generation. Our strong connections and partnerships enable us to provide fruitful outcomes to clients and create value for them at each stage.

## TESTING & COMMISSIONING

---

We work towards buildings revenues across the project operations while simultaneously reducing and decreasing operational costs. We follow the most stringent, comprehensive, and rigorous testing approach for each project.

# SERVICES & CAPABILITIES

## DESIGN AND ENGINEERING

---

Our design engineering team has significant experience and a highly trained engineering team capable of delivering high-quality solutions and uniquely positioning your project with an efficacious outcome.

## CONSTRUCTION

---

We have fully equipped construction teams to handle every varying need for both commercial and utility projects. We deliver turn-key solutions as your trusted partner to manage and maintain your power project from feasibility assessment through full installation and long-term management and maintenance.

## OPERATION & MAINTENANCE

---

Work with an elite team of experts who operate and maintain your project with an efficient and systematic approach. We work with highly qualified and trained personnel who are capable of managing large projects efficiently.

## **SOLAR**

---

We offer end-to-end renewable engineering, procurement, and Construction (EPC) solutions. We offer Innovation coupled with world-class technology and best practices and methodologies that provide effective and efficient solar solutions.

## **OIL AND GAS**

---

We use our preeminent engineering capabilities and extensive expertise to design, build and operate world-class oil and gas facilities. We engineer for safety, optimal efficiency, and low emissions. Our support is extended to various project lifecycles, from new builds to operational improvements. We support you throughout the project lifecycle.

## **ELECTRICAL**

---

We offer unrivaled electrical experience and offer a spectrum of services in the electrical industry, from power transmission to distribution and illumination. We bring an unwavering commitment to quality, safety, and efficiency.
